

Quick-Change Dust Mops

Microfiber Floor Care Dust Mops

NO DUST MOP TREATMENT

Eliminate the time and cost of applying dust mop treatments, the difficulty of cleaning mops after treatments and the wear and tear of frequent laundering associated with mops which have been treated.

PREMIUM MICROFIBER CONSTRUCTION

Premium 100% split polyester microfiber is heat set to prevent fraying while delivering superior capture and hold of dust, dirt, fine filaments and hair from floor surfaces. Double stitching and shorter, tighter stitches result in heavy-duty construction for long life.

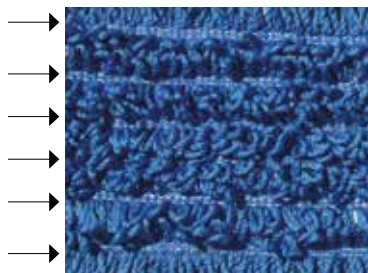

EASY MAINTENANCE

For daily cleaning, simply vacuum the dust mop (backpack vacuum or tank set for dry pick-up) without removing it from the frame. Launder when needed; dust mops are guaranteed for 250 washings. Date code tag helps track service life.

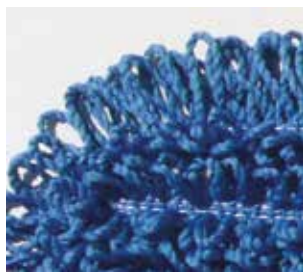

SIX SIZES AVAILABLE

Choose from six lengths to fit your floor dusting needs: 18", 24", 36", 48", 60" and 72"; all in 5" width.

QUICK-CHANGE DUST MOP DETAILS

Six rows of short, tight double stitching with premium thread assure long-term stability.

Premium microfiber delivers maximum capture capability. It is heat set to prevent fraying, leading to a longer lifespan.

Looped Microfiber

Looped end construction adds durability and doesn't fray or leave behind lint or filaments.

Cut Cotton

Dust mop handle attaches quickly to frame. Locking cap slides down to prevent 360° swivel action while allowing 180° turning.

MAINTENANCE ADVANTAGES:

After daily use, vacuum with a backpack vacuum or tank set for dry pickup.

Guaranteed for 250 washings (when washed according to directions).

Can be easily laundered in-house in warm or cold water.

NO DUST TREATMENT:

Save time, cost and hassle by eliminating dust mop treatment.

No concerns with having any slippery residue left on floor.

Microfiber excels in capturing and holding miniscule dust and dirt.
